

PLANTING TREES & SHRUBS

PLANTING INSTRUCTIONS:

1

Dig hole twice as wide as the root ball and only deep enough so that the bottom of the root ball can be placed on undisturbed soil. The top of the root ball should be 1-2 inches above ground level.*

2

Mix soil thoroughly with equal parts of existing soil, **Perlite** and **Compost**.

3

Remove tree or shrub from container and pull or tease roots lightly apart and set in hole.

4

Fill in hole to the top of the root ball. Avoid putting soil on top of the root ball.

5

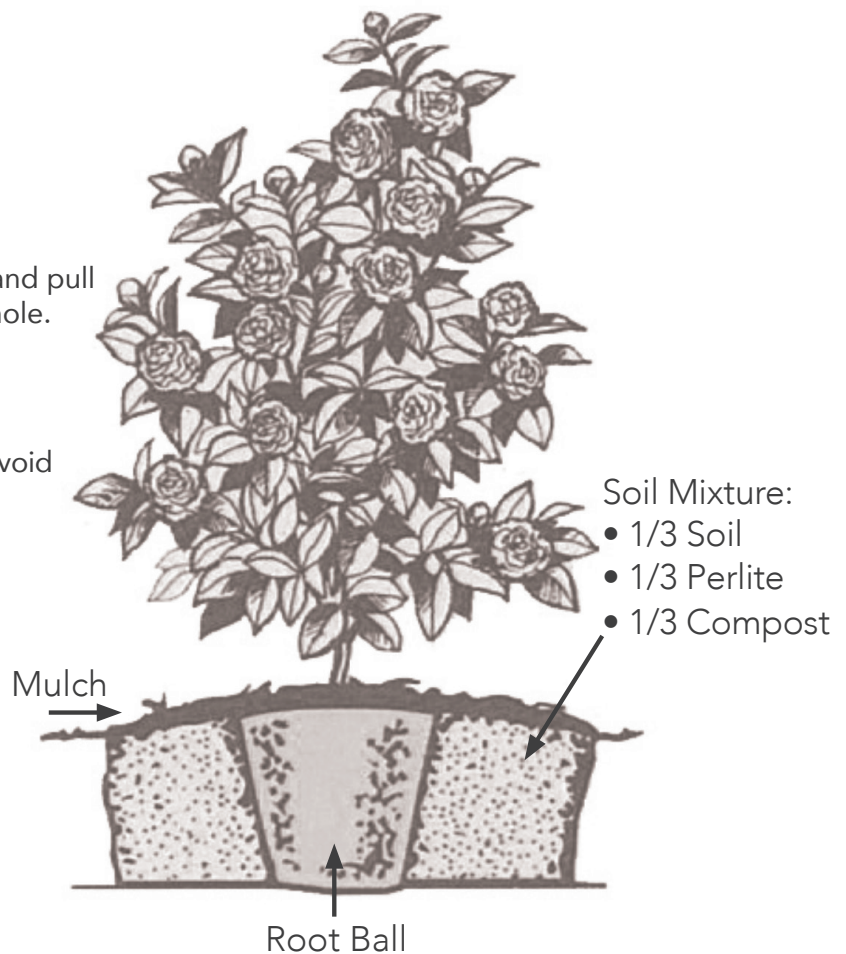

Apply McDonald Greenleaf Fertilizer and Root Stimulator.

6

Cover entire planting area with 2-3 inches of mulch.

7

Water thoroughly.
